

**Wednesday, April 21
2004**

7pm to 9pm

CANWARN

Canadian Weather Amateur Radio Network supervised by the Canadian Weather Office.

The KW Amateur Radio Club Inc sponsors the local CANWARN spotters and radio net controllers.

KWARC – <http://www.kwarc.org/>

KWARC CANWARN <http://www.kwarc.org/canwarn/index.html>

The KW ARC Inc. sponsors the CANWARN training session held in the early spring each year. April has been the usual month to hold the training sessions.

The training session lasts for about 2 hours. The technical discussion and presentation is augmented with a collection of photographs. Many of the photographs in the past presentations were taken by members of the KW ARC Inc.

The photographers are avid storm chasers. They have supplied the US and Canadian weather offices with some unique evidence of the storm formations.

The 1st University of Waterloo Venturer Company members are hosting the venue: while helping as parking attendants and as ushers. They are also licensed Radio Operators.

The information and handouts will definitely help a Scout for the weather requirements of a badge.

The weather module in School will be greatly supplemented by this presentation.

Contact:

Call ahead after 14 April, 2004, to confirm the activity.

Please reserve for groups greater than 3 persons.

Scouter Ed Spike, VE3TCK@rac.ca, (519) 884-2129
